Introduction:

Coating Technologies is the new name for CT-Supplies Ltd. We have been supplying speciality chemical products for over 40 years.

The early product range of adhesive impregnated cloths, peelable coatings, booth additives and paint strippers were all designed to help maintain spray-booths for product painting.

As the business has developed, these and new preparation and cleaning products have found much wider use in such businesses as the asbestos removal and nuclear industry where dangerous dusts must be collected and encapsulated.

Continued:

In 2017, the company took a major step in it's development by becoming the UK Distributor for H B Fuller for their CILBOND® range of bonding agents.

CILBOND is a range of high-performance primers and bonding agents, designed to chemically bond rubber and polyurethane elastomers during the moulding / casting processes to a variety of substrates including metals, plastics and fabrics.

RUBBER - METAL BONDING

CILBOND 10E

One coat bonding system for a range of rubber and plastic compounds. Ideal for injection moulding.

CILBOND 12E

High performance primer system. Used under Cilbond 80ET has outstanding chemical and environmental resistance

CILBOND 20

High performance one coat system for bonding Vamac G and NR compounds. Developed for use in Torsional Vibration Dampers (TVD) where in service temperatures can reach >200C.

CILBOND 24

The premier one coat bonding system with exceptional resistance to fluids such as fuels, antifreeze, boiling water etc. Ideal for engine mounts, suspension mounts, hydromounts, TVD's and hoses.

RUBBER - METAL BONDING (continued)

CILBOND 80ET

CB 80ET is a high performance solvent based cover coat bonding agent for a wide range of rubber compounds

CILBOND 89ET

CB 89 is a high performance solvent based bonding agent for a wide range of rubber compounds by conventional or post vulcanisation moulding techniques.

It's flexibility and adhesion to yarns makes it ideal for timing belts, hoses etc.

Excellent for low temperature (min 70°C) PV bonding

RUBBER - METAL BONDING (Water based products)

CILBOND 62W

CB 62W is virtually solvent free.

CB 62W will act as a one coat bonding agent for polar elastomers to metal and plastics

CB 62W can also be used for two layer bonding under CB80.

CILBOND 65W

CB 65W is a water-based one-component bonding agent for silicone rubber, peroxide-cured fluoroelastomers and HNBR's, and ACM compounds. Recommended for use in silicone hoses, gaskets, oil-seals, TVD's and rollers.

URETHANE (PU) BONDING SYSTEMS

Cilbond 41

Single coat system for low temperature castable PU elastomers, foams and RIM systems

Cilbond 45SF

The industry standard for hot cure PU and TPU.

Cilbond 48

**Fast drying, general purpose PU bonding agent.
No prebake required.**

Cilbond 49SF

Developed from Cilbond 45SF, CB49SF sets the standard for high performance where good hydrolysis and corrosion resistance is required.

BONDING AGENTS FOR FLUOROELASTOMERS

CILBOND 33A & 33B

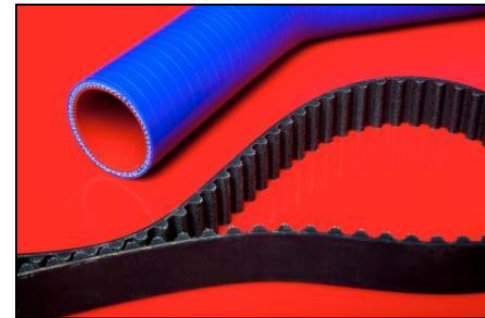

A two component system for single layer bonding for the toughest applications such as oil seals, shaft seals, gaskets, valve seals and rollers.

BONDING AGENTS FOR SILICONE RUBBER

CILBOND 36

CB36 is a one-component system for bonding silicone rubbers* to metal and fabric.

***various peroxide cured silicone, fluorosilicone, perfluoroelastomer, fluoropolymer, hydrogenated nitrile elastomers and some speciality EPDM compounds.**

CIL RELEASE AGENTS

CR 1711E

Aerosol silicone based release agent for epoxy, polyester, PU and rubber compounds

CR 1812E

Aerosol silicone based release agent for both hot and cold processing of polyurethane elastomers and polyester casting systems

CR 393

Release agent for phenolic mouldings

CR 505

Resin based system for tyres, prevents rubber sticking to the moulds

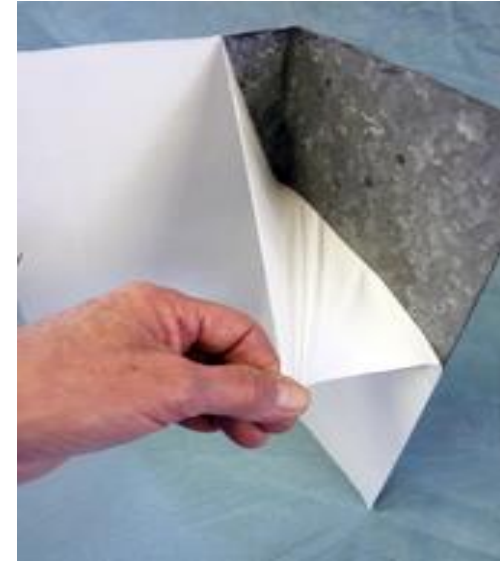

CR 910

Silicone based release agent for polyurethanes

Peelable Coatings provide a clever temporary protective coating for walls, floors and components.

Plastic components such as aluminium sheet, plastic baths or fibreglass boats can be protected from scratches and mechanical damage during installation.

Spray-booth and workshop walls and floors can all be protected with a plastic layer that can be easily removed and replaced.
